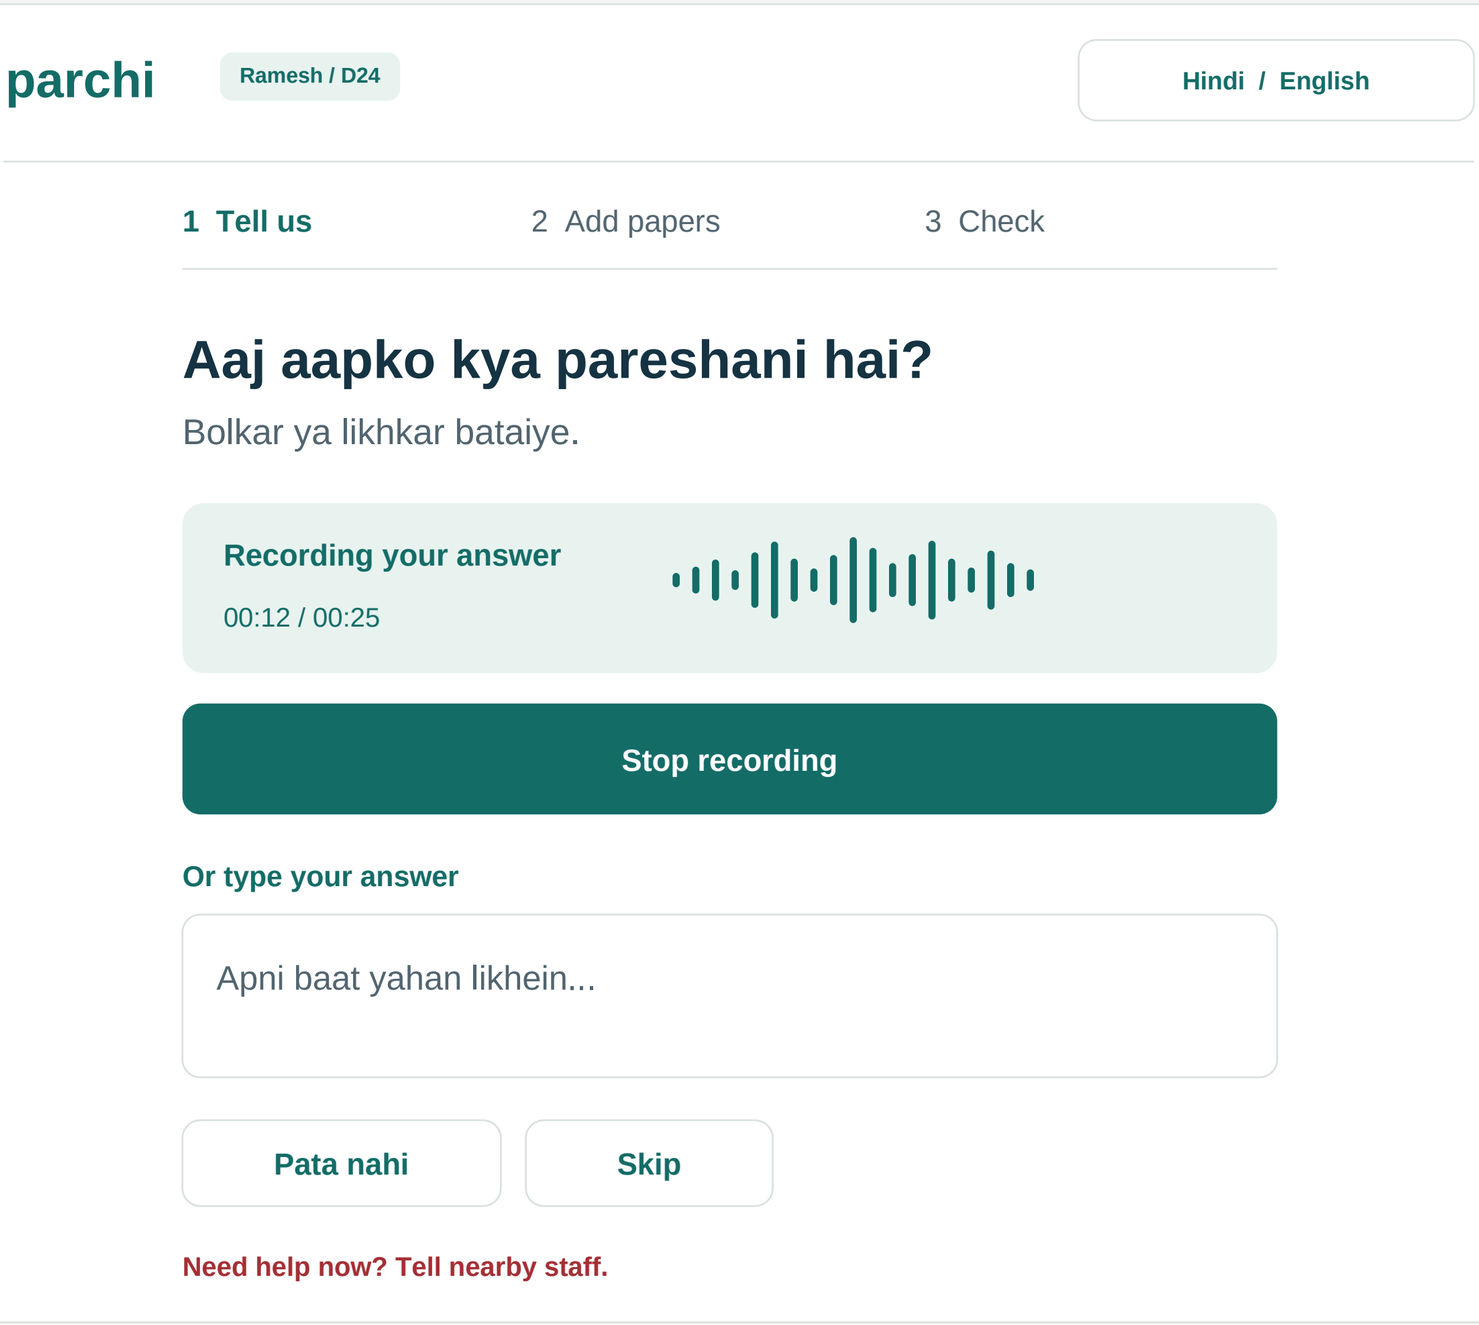
01 Patient intake

A calm, Hindi-first flow. One question, a clear response, and a way to correct it.



Roman Hindi shown here for layout. The implemented default uses Devanagari.

1 Start with the patient

Language, encounter identity and a help action stay visible. No repeated registration form.

2 Voice with control

Tap to start and stop. Real microphone levels, a short clip limit and text fallback.

3 Let them correct it

After transcription, show the understood words with confirm, edit and record-again actions.

4 Keep the next step clear

Allow unknown and skipped answers. Ask only eligible questions tied to unresolved gaps.

02 The doctor brief

Make the 60-second reading target visible. Every clinical field has a source action.

SYNTHETIC DEMO

Ramesh 52 years / D24 / Routine follow-up

Snapshot 9 — 6 / 6 pages

New information: page 4 changes allergies. The brief below stays on snapshot 9. — Review changes

New allergy evidence — **Penicillin allergy recorded. Reaction details unknown.** — Open p4
Clinic A history note / 14 Aug / packet p4 / newer revision

REASON FOR VISIT

Brings old prescriptions and reports; medicine name initially unsure. [q1] — Play answer

Patient reports using the older 25 mg tablets; has not bought the new ones.

MEDICINE ACCOUNTS

Medicine	Documented prescription	Patient reports
Metoprolol	50 mg / BD [p3] Previously 25 mg [p1]	Older 25 mg; frequency not stated [q2]

Identity must be confirmed in context. No instruction to change treatment.

RECENT LABS

Hemoglobin 12.9 g/dL [p2]
Report range 13.0-17.0 / 02 Sep

Creatinine 1.1 mg/dL [p6]
Report range 0.7-1.3 / 12 Sep

DATED HISTORY — + earlier records

02 Sep	04 Sep	10 Sep	12 Sep
Lab report	Clinic B	Clinic C / historical Rx	Lab report
Open p2	Open p3	Open p5	Open p6

03 Source review inside the staff screen

A nurse can check what the document says without claiming to resolve the clinical question.

SYNTHETIC DEMO

Ramesh / Source checks

1 item selected

Medicine strength

Critical numeric field awaiting source check.

Clinic B / 04 Sep / packet page 3

What verification means

Confirm the reading against the source. Clinical use and treatment decisions stay with the doctor.

Review history

Original candidate retained. A correction creates a new fact revision and records the reviewer.

Evidence / p3

Source region

Clinic B / prescription / 04 Sep 2026

CLINIC B / SYNTHETIC

Ramesh / 52 years / SYN-R52

Metoprolol 50 mg | BD

Formulation/release type: not recorded.

Original page remains available with zoom.

Proposed field

Medicine strength: 50 mg

Checking the source does not approve this medicine or dose.

Confirm reading | Correct | Unreadable

Action saved with actor, time, original value and new revision.
